INTERNSHIPS

Web Development

Intershala-Online training and internship provider.

Web Development by using HTML, CSS, Bootstrap, SQL and PHP modules.

PROJECTS

Accident Prevention and Speed Breaker Power Generation (2019 - 2020)
To avoid these types of accidents we introduce the alert systemby using different types of sensors. It consists of two types one is transmitter and another is receiver. And in model we are going to introduce one of such method which is generation of electricity by using roller mechanism.

Web Designing by using HTML
We design the model for the Web environment and implement for classroom use. The model can be applied to any subject. We show that the model can be applied for environmental education as an instance.

Institute Management System (IMS)
IMS will have separate databases for separate departments of institute to make management easy. Different level of access will be granted to teachers, students, administrators and other users will decide their accessibility to data and the data they can modify/updat
